## OIL MARKET COMMENTARY

### Price Adjustments and Forecasts

Oil prices held steady after OPEC+ agreed on 7 September to unwind its second tranche of supply cuts, first introduced in April 2023. Oil traders are broadly grappling with the balance between geopolitical risks and rising supplies, which has kept prices trapped in a band between roughly \$62 and \$68 a barrel since the start of August.

By September, OPEC+ crude output rose 1.5 mb/d since 1Q25, short of the 2.5 mb/d target—led mainly by Saudi Arabia and core Middle Eastern producers.

### Supply and Demand Dynamics

Global oil supply rose in August to a record 106.9 mb/d, driven by OPEC+ easing cuts and near-peak non-OPEC+ output.

World oil demand is projected to grow by 740 kb/d in 2025, with strong OECD deliveries early in the year offset by weaker emerging market demand. OECD growth has outperformed in 1H25 but is expected to contract later, keeping overall 2025 demand flat.

### Window Outlook - 16th September 2025

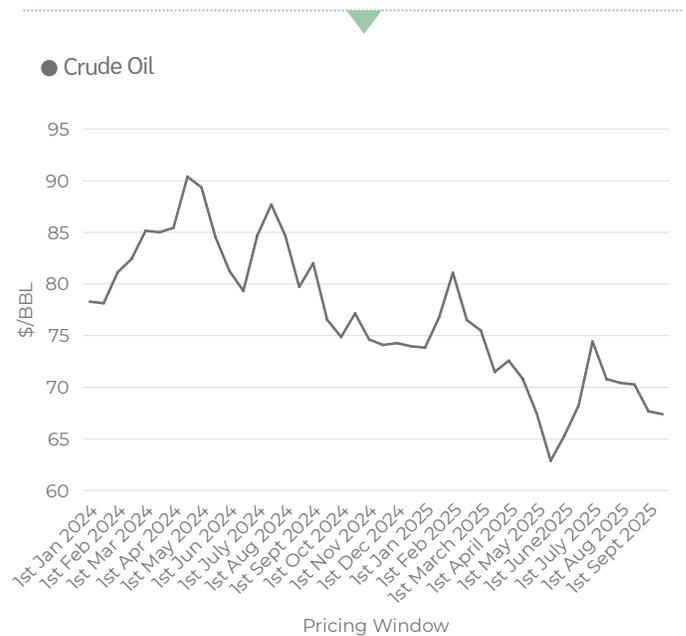

For international product prices, crude oil registered a decline of 0.41%, while petrol, diesel, and LPG recorded respective increases of 2.52%, 4.12%, and 2.69%.

## TAXES, LEVIES, AND REGULATORY MARGINS

The Ghana Revenue Authority (GRA) has announced the implementation of the Energy Sector Levies (Amendment) (No. 2) Act, 2025 (Act 1145), effective 1<sup>st</sup> September 2025. Under the new amendment, the Energy Sector Shortfall and Debt Repayment Levy (ESSDRL) for Marine Gas Oil (MGO–Local) has been increased.

In addition, two new levies have been introduced on MGO–Local namely, the Road Fund Levy and the Energy Fund Levy. The Act also extends the Energy Fund Levy to cover Kerosene. The revised levy rates are as follows:

Product (GHS)	New Rate (From 1 <sup>st</sup> Sept. 2025)		
	ESSDRL	RFL	EFL
MGO Local	1.93	0.48	0.01
Kerosene	-	-	0.01

## PROJECTED PRICING 16TH - 30TH SEPTEMBER 2025

### Crude Oil Market Dynamics

Crude oil prices continues its dip 0.41%, sliding from \$67.67 to \$67.39 per barrel. Currently, the market is caught in a "tug-of-war between increasingly bearish fundamentals and heightened geopolitical risks," according to analysts at Citigroup Inc.

### Product Prices on the International Market

Contrary to the dip in crude prices, international product prices for petrol, diesel, and LPG recorded respective increases of 2.52%, 4.12%, and 2.69%.

### Cedi Performance

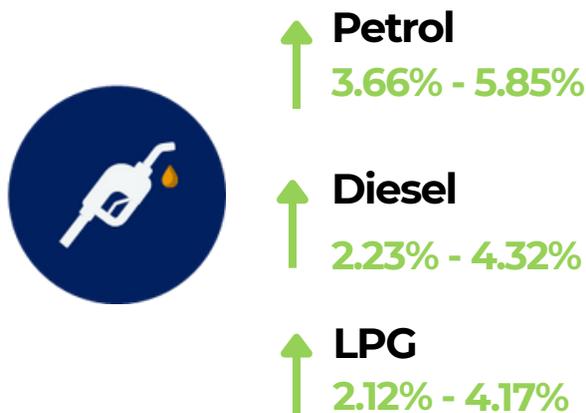

For the 16th September 2025 pricing window, the cedi depreciated from GHS 11.20 to GHS 12.07 to the dollar, a 7.76% drop. This brings its year-to-date loss to 14.02%, one of the steepest globally per Bloomberg. The decline is primarily due to strong demand for the dollar for import, ahead of the festive season.

### Ex-pump price projection

Petrol, diesel, and LPG prices at the pump are projected to rise by 3.66% to 5.85%, 2.23% to 4.32%, and 2.12% to 4.17% respectively. The increase is driven by higher international product prices and the continued depreciation of the cedi.

Ghana's reliance on imported petroleum products leaves ex-pump prices highly vulnerable to currency fluctuations, with the recent cedi depreciation a key driver of the projected increases.
